

Alaska

A Hunger and Poverty Snapshot

Between 2019-2021:

- Food insecurity in Alaska averaged 9.50%.¹
- Alaska’s food insecurity rate was 9% lower than the nation as a whole (10.4%).²
- The official poverty rate (which does not account for income from safety-net and tax-support programs such as SNAP, EITC, and others) in the state averaged 11.70%.³
- But using the Supplemental Poverty Measure (which does include safety-net and tax-support income), the poverty rate falls to 9.8%.⁴ In other words, these programs reduced the poverty rate in Alaska by 16% and the number of people living in poverty by 13,000.⁵
- SNAP, alone, lifted 24,000 people above the poverty line in Alaska, including 11,000 children, per year between 2013 and 2017, on average.⁶

Why Bread for the World is Focused on the Farm Bill

The Farm bill is scheduled to be reauthorized in 2023. No legislation has more impact than a farm bill on the US food system and the nation’s ability to provide healthy food at affordable prices to everyone.

Bread for the World’s farm bill priorities include a focus on nutrition, equity, and sustainability. We believe Alaska has a lot to gain from a farm bill legislated with these priorities in mind.

Nutrition	Equity	Sustainability
<p>Bread for the World supports strengthening SNAP in Alaska.</p> <p>Not only is SNAP the flagship food security and nutrition program, it is indispensable to better health outcomes and economic prosperity.</p> <p>In 2021, 11% of Alaska residents were helped by SNAP.¹¹</p> <ul style="list-style-type: none"> Roughly 31,000 workers in Alaska live in households that participated in SNAP in 2021.¹² SNAP helps 1 in 11 workers in Alaska put food on the table.¹³ 67% of SNAP participants were in families with children, and 30% in families with members who are older adults or are disabled.¹⁴ 88% of all SNAP-eligible people in Alaska participate in the program.¹⁵ 	<p>Bread for the World supports farm policies that promote a more equitable food system in Alaska.</p> <p>The Alaska population is 59.3% white. According to the most recent Census of Agriculture, 93% of farmers and ranchers (producers) in Alaska are white and occupy 62% of all farmland.¹⁶</p> <ul style="list-style-type: none"> Indigenous producers represent 4% and occupy 38% of farmland. The majority are subsistence farms producing for families and neighbors. Black producers represent <1% and occupy <1% of farmland. Hispanic producers represent <1% and occupy <1% of farmland. Asian producers represent <1% and occupy <1% of farmland. 	<p>Bread for the World is committed to eradicating food insecurity by building a more sustainable food system in Alaska.</p> <p>Reducing unnecessary food waste is one way to build a more sustainable food system.</p> <p>In 2019, 120,000 tons¹⁷ of surplus food in Alaska went to waste instead of reaching those who needed it, an amount equal to:</p> <ul style="list-style-type: none"> 192 million meals unsold or uneaten.¹⁸ \$888 million in lost sales.¹⁹ Annual CO2 emissions produced by 117,215 gasoline-powered cars.^{20,21}
