

Hawaii

A Hunger and Poverty Snapshot

Between 2019-2021:

- Food insecurity in Hawaii averaged 9.10%.¹
- Hawaii's food insecurity rate was 12.5% lower than the national average of 10.4%.²
- The poverty rate in Hawaii in 2021 (using the Supplemental Poverty Measure) was 10.5%, which was 2.7 percentage points higher than the nation overall (7.8%).³
- Hawaii's poverty rate is high compared to the rest of the nation in large part because of the high cost of housing. Four in 10 low-income people in Hawaii are homeless or pay over half their income for rent.⁴
- SNAP, alone, lifted 69,000 people above the poverty line in Hawaii, including 30,000 children, per year between 2013 and 2017, on average.⁵

Why Bread for the World is Focused on the Farm Bill

The Farm bill is scheduled to be reauthorized in 2023. No legislation has more impact than a farm bill on the US food system and the nation's ability to provide healthy food at affordable prices to everyone.

Bread for the World's farm bill priorities include a focus on nutrition, equity, and sustainability. We believe Hawaii has a lot to gain from a farm bill legislated with these priorities in mind.

Nutrition	Equity	Sustainability
<p>Bread for the World supports strengthening SNAP in Hawaii.</p> <p>Not only is SNAP the flagship food security and nutrition program, it is indispensable to better health outcomes and economic prosperity.</p> <p>In 2021, 14% of Hawaii residents were helped by SNAP.¹⁰</p> <ul style="list-style-type: none"> • Roughly 74,000 workers in Hawaii live in households that participated in SNAP in 2021.¹¹ • SNAP helps 1 in 9 workers in Hawaii put food on the table.¹² • 60% of SNAP participants were in families with children, and 36% in families with members who are older adults or are disabled.¹³ • 88% of all SNAP-eligible people in Hawaii participate in the program.¹⁴ 	<p>Bread for the World supports farm policies that promote a more equitable food system in Hawaii.</p> <p>The Hawaii population is 21.4% white. According to the most recent Census of Agriculture, 45% of farmers and ranchers (producers) in Hawaii are white and occupy 63% of all farmland.¹⁵</p> <ul style="list-style-type: none"> • Asian producers represent 26% and occupy 16% of farmland. • Native Hawaiian/Pacific Islander producers represent 9% and occupy 6% of farmland. • Hispanic producers represent 6% and occupy 5% of farmland. • Producers of more than one race represent 12% and occupy 20% of farmland. • Black producers represent <1% and occupy <1% of farmland. 	<p>Bread for the World is committed to eradicating food insecurity by building a more sustainable food system in Hawaii.</p> <p>Reducing unnecessary food waste is one way to build a more sustainable food system.</p> <p>In 2019, 211,000 tons¹⁶ of surplus food in Hawaii went to waste instead of reaching those who needed it, an amount equal to:</p> <ul style="list-style-type: none"> • 341 million meals unsold or uneaten.¹⁷ • \$1.68 billion in lost sales.¹⁸ • Annual CO2 emissions produced by 182,933 gasoline-powered cars.^{19,20}
