

Montana

A Hunger and Poverty Snapshot

Between 2019-2021:

- Food insecurity in Montana averaged 10.4%.¹
- Montana's food insecurity rate was identical to the national average of 10.4%.²
- The official poverty rate (which does not account for income from safety-net and tax-support programs such as SNAP, EITC, and others) in the state averaged 10.4%.³
- But using the Supplemental Poverty Measure (which does include safety-net and tax-support income), the poverty rate falls to 8.2%.⁴ In other words, these programs reduced the poverty rate in Montana by 21% and the number of people living in poverty by 24,000.⁵
- SNAP, alone, lifted 26,000 people above the poverty line in Montana, including 11,000 children, per year between 2013 and 2017, on average.⁶

Nutrition and Health

Diabetes and other diet-related health costs in Montana were estimated to be \$820 million⁷ in 2017.

9.1% of the adult population in Montana has been diagnosed with diabetes in 2020.8 This includes:

- 17.0% of seniors.
- 17.1% of Indigenous adults.
- 14.3% of adults with incomes of less than \$25,000.

Every year an estimated 6,515⁹ adults in Montana are diagnosed with diabetes.

Only 10.0% of adults in the state are meeting recommended fruit intake and 9.6% recommended vegetable intake. 10

Why Bread for the World is Focused on the Farm Bill

The Farm bill is scheduled to be reauthorized in 2023. No legislation has more impact than a farm bill on the US food system and the nation's ability to provide healthy food at affordable prices to everyone.

Bread for the World's farm bill priorities include a focus on nutrition, equity, and sustainability. We believe Montana has a lot to gain from a farm bill legislated with these priorities in mind.

Nutrition

Bread for the World supports strengthening SNAP in Montana.

Not only is SNAP the flagship food security and nutrition program, it is indispensable to better health outcomes and economic prosperity.

In 2021, 9% of Montana residents were helped by SNAP.¹¹

- Roughly 337,900 workers in Montana live in households that participated in SNAP in 2021.¹²
- SNAP helps 1 in 13 workers in Montana put food on the table.¹³
- 65% of SNAP participants were in families with children, and 35% in families with members who are older adults or are disabled.¹⁴
- 79% of all SNAP-eligible people in Montana participate in the program.¹⁵

Equity

Bread for the World supports farm policies that promote a more equitable food system in Montana.

The Montana population is 85.5% white. According to the most recent Census of Agriculture, 94% of farmers and ranchers (producers) in Montana are white and occupy 90% of all farmland.¹⁶

- Black producers represent <1% and occupy <1% of farmland.
- Hispanic producers represent 1% and occupy 2% of farmland.
- Asian producers represent <1% and occupy <1% of farmland.
- Indigenous producers represent 4% and occupy 8% of farmland.

Sustainability

Bread for the World is committed to eradicating food insecurity by building a more sustainable food system in Montana.

Reducing unnecessary food waste is one way to build a more sustainable food system.

In 2019, 141,000 tons¹⁷ of surplus food in Montana went to waste instead of reaching those who needed it, an amount equal to:

- 226 million meals unsold or uneaten.¹⁸
- \$971 million in lost sales. 19
- Annual CO2 emissions produced by 134,237 gasoline-powered cars.²⁰,²¹
