

# Utah

## A Hunger and Poverty Snapshot

Between 2019-2021:

- Food insecurity in Utah averaged 11.2%.<sup>1</sup>
- Utah’s food insecurity rate was 7% higher than the national average of 10.4%.<sup>2</sup>
- The official poverty rate (which does not account for income from safety-net and tax-support programs such as SNAP, EITC, and others) in the state averaged 7.5%.<sup>3</sup>
- But using the Supplemental Poverty Measure (which does include safety-net and tax-support income), the poverty rate falls to 6.5%.<sup>4</sup> In other words, these programs reduced the poverty rate in Utah by 13% and the number of people living in poverty by 33,000.<sup>5</sup>
- SNAP, alone, lifted 47,000 people above the poverty line in Utah, including 23,000 children, per year between 2013 and 2017, on average.<sup>6</sup>

## Why Bread for the World is Focused on the Farm Bill

The Farm bill is scheduled to be reauthorized in 2023. No legislation has more impact than a farm bill on the US food system and the nation’s ability to provide healthy food at affordable prices to everyone.

Bread for the World’s farm bill priorities include a focus on nutrition, equity, and sustainability. We believe Utah has a lot to gain from a farm bill legislated with these priorities in mind.

Nutrition	Equity	Sustainability
<p>Bread for the World supports strengthening SNAP in Utah.</p> <p>Not only is SNAP the flagship food security and nutrition program, it is indispensable to better health outcomes and economic prosperity.</p> <p>In 2021, 5% of Utah residents were helped by SNAP.<sup>11</sup></p> <ul style="list-style-type: none"> <li>Roughly 82,900 workers in Utah live in households that participated in SNAP in 2021.<sup>12</sup></li> <li>SNAP helps 1 in 17 workers in Utah put food on the table.<sup>13</sup></li> <li>77% of SNAP participants were in families with children, and 26% in families with members who are older adults or are disabled.<sup>14</sup></li> </ul> <p>77% of all SNAP-eligible people in Utah participate in the program.<sup>15</sup></p>	<p>Bread for the World supports farm policies that promote a more equitable food system in Utah.</p> <p>The Utah population is 77% white. According to the most recent Census of Agriculture, 93% of farmers and ranchers (producers) in Utah are white and occupy 61% of all farmland.<sup>16</sup></p> <ul style="list-style-type: none"> <li>Black producers represent &lt;1% and occupy &lt;1% of farmland.</li> <li>Hispanic producers represent 2% and occupy 2% of farmland.</li> <li>Asian producers represent &lt;1% and occupy &lt;1% of farmland.</li> <li>Indigenous producers represent 4% and occupy 37% of farmland.</li> </ul>	<p>Bread for the World is committed to eradicating food insecurity by building a more sustainable food system in Utah.</p> <p>Reducing unnecessary food waste is one way to build a more sustainable food system.</p> <p>In 2019, 540,000 tons<sup>17</sup> of surplus food in Utah went to waste instead of reaching those who needed it, an amount equal to:</p> <ul style="list-style-type: none"> <li>867 million meals unsold or uneaten.<sup>18</sup></li> <li>\$82.98 billion in lost sales.<sup>19</sup></li> <li>Annual CO2 emissions produced by 480,496 gasoline-powered cars.<sup>20,21</sup></li> </ul>
