New Jersey

A Hunger and Poverty Snapshot

Between 2019-2021:
- Food insecurity in New Jersey averaged 8.3%.[1]
- New Jersey's food insecurity rate was 20% lower than the national average of 10.4%.[2]
- The poverty rate in New Jersey in 2021 (using the Supplemental Poverty Measure) was 8.1%, which was 0.3 percentage points higher than the national average of 7.8%.[3]
- New Jersey's poverty rate is high compared to the rest of the nation in large part because of the high cost of housing. Four in 10 low-income people in New Jersey are homeless or pay over half their income for rent.[4]
- SNAP, alone, lifted 155,000 people above the poverty line in New Jersey, including 70,000 children, per year between 2013 and 2017, on average.[5]

Prevalence of food insecurity, average 2019–21

Food insecurity above U.S. average
Food insecurity near U.S. average (10.4 percent)
Food insecurity below U.S. average

Nutrition and Health

Diabetes and other diet-related health costs in New Jersey were estimated to be $9.2 billion[6] in 2017.

10% of the adult population in New Jersey has been diagnosed with diabetes in 2020.[7] This includes:
- 21.4% of seniors.
- 13.7% of Black adults.
- 18.7% of adults with incomes of less than $25,000.

Every year an estimated 54,676[8] adults in New Jersey are diagnosed with diabetes.

Only 9% of adults in the state are meeting recommended fruit intake and vegetable intake.[9]

Why Bread for the World is Focused on the Farm Bill

The Farm bill is scheduled to be reauthorized in 2023. No legislation has more impact than a farm bill on the US food system and the nation's ability to provide healthy food at affordable prices to everyone.

Bread for the World's farm bill priorities include a focus on nutrition, equity, and sustainability. We believe New Jersey has a lot to gain from a farm bill legislated with these priorities in mind.

Nutrition	Equity	Sustainability

Bread for the World supports strengthening SNAP in New Jersey.

Not only is SNAP the flagship food security and nutrition program, it is indispensable to better health outcomes and economic prosperity.

In 2021, 9% of New Jersey residents were helped by SNAP.[10]

- Roughly 288,000 workers in New Jersey live in households that participated in SNAP in 2021.[11]
- SNAP helps 1 in 15 workers in New Jersey put food on the table.[12]
- 64% of SNAP participants were in families with children, and 47% in families with members who are older adults or are disabled.[13]
- 82% of all SNAP-eligible people in New Jersey participate in the program.[14]

Bread for the World supports farm policies that promote a more equitable food system in New Jersey.

The New Jersey population is 53.5% white. According to the most recent Census of Agriculture, 94% of farmers and ranchers (producers) in New Jersey are white and occupy 96% of all farmland.[15]

- Black producers represent <1% and occupy <1% of farmland.
- Hispanic producers represent 3% and occupy 2% of farmland.
- Asian producers represent 1% and occupy 2% of farmland.
- Indigenous producers represent <1% and occupy <1% of farmland.

Bread for the World is committed to eradicating food insecurity by building a more sustainable food system in New Jersey.

Reducing unnecessary food waste is one way to build a more sustainable food system.

In 2019, 1.64 million tons[16] of surplus food in New Jersey went to waste instead of reaching those who needed it, an amount equal to:

- 2.62 billion meals unsold or uneaten.[17]
- $10.6 billion in lost sales.[18]
- Annual CO_2 emissions produced by 1,407,014 gasoline-powered cars.[19],[20]
